Catalog exchange format : changelog v1 to v2

What is version 2 ?

- Exchange format dependent on producer new referentials
- Complete rewrite of files following e**X**change **F**or **T**ravel standard.
- Adding data, images and more structured contents

Catalog feeds is completely rewritten and this document details changes between old version (v1) and this version (v2). This changelog concerns only products contents (for example, ships contents are not in v1 version).

Catalog feeds contains more structured contents and only contents (no more prices and availabilities). Complete documentation of new catalog exchange format is in v2 documentation.

New functional rules :

- All products of CroisiEurope brochure are published in files   => use PAC feeds or cruise feeds to filter
- No more departures dates and prices "from"   => dates and prices are in PAC feeds or cruise feeds

Correspondence of products contents :

A product detailed in /fournisseur/catalogue/produits/produit nodes (v1) is now detailed in Catalogue/Segments/Segment nodes (v2).

1) *Characteristics, keywords and images of products*

Group	Xpath v1	Xpath v2	Observation
Characteristics	/nom_produit/libelle CDATA		Title – see next § (Title)
Characteristics	/informations_generiques/references/interne_to/libell e CDATA	/Catalogue/Segments/Segment/Code[@Role="Produc t"] @Value	Product code
Characteristics	/informations_formule/croisiere/hebergements_bateau/h ebergement_bateau/type_cabine @value	/Catalogue/Segments/Segment/Segments/Segments[@What="Details"/Rooms/Room] @Code	Marketing type of cabines
Characteristics	/informations_generiques/destinations/destination/arr ivee/ville/iata @value	/Catalogue/Segments/Segment/Segments/Segments/ Segment/At/Location/City @Ref	Adding complete referentials - see v2 documentation
Keywords	/informations_formule/croisiere/accompagnement_croisi ere/descriptif/paragraphe/	/Catalogue/Segments/Segment/Keywords/Keyword	Adding complete referentials - see v2 documentation
Images	/informations_formule/descriptif/paragraphe/objet[@ty pe_objet="photo"]	/Catalogue/Segments/Segment/Descriptions/Descr iption/Media	See v2 documentation

2) Products contents

Each v1 content node is a v2 Description node like :

```
<Description Group="Itinerary" Role="Body" Index="1">
  <Types>    <Type Ref="TY_Trip" />  </Types>
  <Codes>    <Code Role="Type" Key="VOYAGECOURT" />  </Codes>
  <Title><![CDATA[a title]]></Title>
  <Text><![CDATA[a content]]></Text>
</Description>
```

Qualified bloc with red attribute with :
- a Title
- a Text
